Components

Specifications

- **Capacity**
Varying capacities are available for every application eg: 5kpa to 10kpa, in accordance with the Building Code of Australia.
- **Finish**
All equipment offered high quality bright galvanised and Dulux® powdercoated components.
- **Flooring**
Floor deck is offered either in steel grating or structural timber flooring, in accordance with the Building Code of Australia.
- **Flexibility**
The system can be designed to suit your precise needs. Since it is a free standing design the equipment can be completely dismantled and relocated.

Applications

APC's Raised Storage Area is the most versatile product of its kind on the market. The system is compatible with other quality APC products such as: Unishelving, Uni-Span and Pallet Racking.

The APC RSA system provides the optimum use of floor space within the shell of an existing building. The economics of such an investment is always profitable, since this requires a much lower investment than the cost of land.

Assembly

The system is engineered to be totally freestanding and does not depend on the building for support.

APC premium quality components make it easy to assemble with stand up frames and clip in beams.

Features & Benefits

Many variations can be designed to meet your exact needs. Structural systems or APC Storack™ Racking and Shelving components can form the support structure to provide the most economical method to extend your work or storage areas.

The secret behind an efficient is the access stairs, APC stairs are without doubt, second to none! High quality construction and full compliance with the Australian Standards and Building Code of Australia ensure personnel safety is never compromised.
